PROFESSIONAL SUMMARY

B. Tech CSE-AIML student with expertise in data visualisation, wrangling, statistical analysis, and predictive modelling with hands-on experience in the Data Science & Analytics field and AI Integration. Proficient and passionate in **SQL, Python, Power BI, Machine Learning and Excel**, with hands-on experience in ETL, automation, and dashboarding. Strong problem-solving skills, eager to apply analytical expertise in a data-driven environment.

EDUCATION

Mahatma Gandhi Mission's College of Engineering & Technology, Noida

Bachelor of Technology (CSE specialisation in AI-ML) (2022 – 2026) CGPA – 7.5

WORK EXPERIENCE

MOBCODER — AI/ML Engineer Trainee | Mar 2026 – Present | Noida

- Developed AI-powered backend applications using **Python, FastAPI, LLMs, RAG, and AI Agents**.
- Built intelligent AI workflows using **LangChain and LangGraph** for agent-based application development.
- Integrated **OpenAI and Google Gemini APIs** with AI applications and backend services.
- Worked with **Vector Databases** to support retrieval-augmented generation and contextual AI responses.

Appwars Technologies | Data Science Internship cum Course | Online (SEP 9th, 2025- APRIL 12th, 2026)

- **Currently pursuing** a structured Data Science internship cum course under App Wars, aligned with industry best practices
- Building proficiency in **Python, SQL, Machine Learning, Deep Learning, Power BI, Generative AI, Natural Language Processing (NLP), and Large Language Models (LLMs)** □ Applying analytical techniques for **data analysis, data visualisation, predictive modelling, and Artificial Neural Network (ANN) development** to generate actionable, data-driven insights

TANVIKA SOFTWARE | Data Analytics and Visualizations | On-Site (JUN 8th, 2025– AUG 16th, 2025)

- **Data Analysis & Visualisation:** Analysed large datasets using Excel and Python; built dashboards with Matplotlib, Seaborn, and Power BI to deliver insights.
- **Data Modelling & Collaboration:** Developed efficient data models and collaborated with cross-functional teams to deliver data-driven solutions.

PROJECTS

▣ **Multi-Agent Travel Planner | Python, LangGraph**

Developed a **LangGraph-based multi-agent travel planner** with intelligent itinerary generation and task orchestration.

▣ **AI Healthcare Assistant (MedSync) | Python, FastAPI, LLM, RAG**

Built an AI healthcare assistant with **appointment booking, RAG, and AI-agent workflows** using FastAPI and LLMs.

○ **Interactive E-Commerce Sales Insights Dashboard | Power BI & Excel**: Built an interactive Power BI dashboard to monitor key e-commerce sales metrics, using drill-through navigation, dynamic tooltips, and scrollers to deliver clear performance visibility and actionable business insights.

○ **Sentiment Analysis Tool**: A comprehensive sentiment analysis application built with Streamlit that provides three main sections for analysing text sentiment: single text analysis, dataset analysis, and history tracking.

○ **Library Resource & Transaction Management System | Python, MySQL & Streamlit**: Designed and developed a fullstack Library Management System using Python, MySQL, and Streamlit to efficiently manage book records, user transactions, and availability, improving operational efficiency and overall user experience.

○ **Iris Flower Classification Using K-Nearest Neighbors (KNN) | Machine Learning**

Developed an end-to-end machine learning model to classify Iris flower species using the K-Nearest Neighbors (KNN) algorithm.

Preprocessed and analyzed data with **Python, Pandas, and Scikit-learn**, including feature preparation and label mapping.

Trained and evaluated the model using train-test splitting and a classification report to assess performance.

○ **Face Detection Attendance System | Python, OpenCV, Machine Learning & Deep Learning**: Developed a real-time attendance system using CNN and machine learning-based face recognition to accurately detect and record student/employee attendance while maintaining individual student records.

Leveraged Python, OpenCV, and deep learning models for automated detection and recognition, improving efficiency and minimising manual errors. Maintained a systematic attendance log for quick retrieval, reporting, and tracking of attendance history.

CERTIFICATES

- **IBM Internship Certificate SkillsBuild: “Build an AI Agent” | IBM SkillsBuild. Specialised in Agentic AI and autonomous systems**
- **IBM Certificate: “Machine Learning with Python” | IBM Developer Skills Network. Certified in ML algorithms & predictive modelling**
- **IBM Developer Skills Network Certified: Data Analysis & Data Visualisation with Python — skilled in statistical modelling, data wrangling, interactive dashboards, and data storytelling.**
- **Certificate: “Python for Data Science” | Intellipaat. Professional excellence in Python programming, data manipulation, and analysis**

SKILLS

Programming: Python, SQL

Generative AI: LLMs, RAG, AI Agents

AI Frameworks: LangChain, LangGraph, LangFlow

AI Models & APIs: OpenAI API, Google Gemini, GROQ, NVIDIA

Machine Learning: Scikit-learn, PyTorch, TensorFlow, CNN, LSTM, Transformers

Backend Development: FastAPI, REST APIs, Flask

Databases: MySQL, Vector Databases, FAISS, ChromaDB

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel

Version Control: Git, GitHub
